Item 12. CORPORATE GOVERNANCE

The Bank acknowledges that corporate governance is a dynamic concept and is a framework of rules, systems and processes in the organization. It governs the performance of the Board of Directors and Management of their respective duties and responsibilities to the stockholders and other stakeholders. It provides direction for the promotion of a strong corporate governance culture and recognizes current best practices. It also strives to raise corporate governance standards to a level that is at par with global standards and ultimately contributes to the development of Philippine capital markets.

The Bank adheres to the highest principles of good corporate governance as embodied in its Amended Articles of Incorporation, Amended By-Laws Code of Conduct and Revised Corporate Governance Manual. It subscribes to the philosophy of rational checks and balances, fairness, integrity, accountability and transparency in its manner of doing business, dealing fairly with its clients, investors, stockholders, and the communities affected by the Bank's activities. The Bank espouses professionalism among its Board of Directors, executives and employees, subsidiaries and affiliates and respect for laws and regulations.

The Bank's operations are managed through an established organizational structure with adequate policies and procedures embodied in manuals approved by management, board committees and the Board of Directors. These manuals are subjected to periodic review and are updated to be consistent with the new laws and regulations and to conform with international standards and best practices. The Bank has adopted the Revised Corporate Governance Manual to align its internal policies with recently issued regulatory guidelines and new reportorial disclosures for significant transactions among related parties.

The Bank was a recipient of the Silver Award for good corporate governance from the Institute of Corporate Directors (ICD) for two consecutive years, in 2011 and 2012. This is in recognition of the Bank's existing organization composed of dedicated corporate directors and senior management committed to the professional corporate directorship in line with global principles of modern corporate governance.

In 2015, PNB was recognized among all publicly listed companies in the country by the PSE as one of the Top Ten Bell Awardees. The awards commend listed companies and trading participants that practice the highest standards of corporate governance in the country.

Board of Directors

PNB is led by its Board of Directors, which is composed of fifteen members including five independent directors and the Chairperson. The members of the Board are elected annually by the stockholders. The Board is primarily responsible for approving and overseeing the implementation of the Bank's strategic objectives, risk management strategy, corporate governance, and corporate values.

The Board represents a combination of highly qualified business professionals, former bank presidents, and former senior officials affiliated with regulatory bodies and international organizations such as the International Monetary Fund and the World Bank, individuals with distinct finance, audit and legal competencies, and collectively holds a broad range of expertise and related banking experience that provide value to the strengthening and upholding of good corporate governance practices in the Bank.

The Board of Directors, the key officers of the Bank and its subsidiaries undergo continuing training in corporate governance. The most recent seminar was conducted by the ICD in December 2015. There are two directors inducted "fellow" by the Philippine ICD and one director certified as a "fellow" by the Australian ICD. This is in recognition of their distinguished reputation and commitment to the highest standards of corporate governance principles, ethics and social responsibility.

Independent Directors

In carrying out their responsibilities, the directors must act in a prudent manner and exercise independent judgment while encouraging transparency and accountability. The Bank has five (5) independent directors representing 33% of the members of the Board, beyond the 20% requirement of the SEC. The appointment of the 5 independent directors composed of the Board Chairperson Florencia G. Tarruela, and Messrs. Felix Enrico R. Alfiler, Deogracias N. Vistan, Cecilio K. Pedro and Federico C. Pascual, were approved and confirmed by the appropriate regulatory bodies.

The independent directors act as Chairman of the Board, Board Policy Committee, Corporate Governance/Nomination/Remuneration Committee, Board Oversight Committee – Domestic and Foreign Offices/Subsidiaries, Board Audit and Compliance Committee, Board Oversight Related Party Transaction (RPT) Committee, and Risk Oversight Committee. Some of the independent directors are also members of the Trust Committee.

Chairperson of the Board

The Chairperson of the Board is Ms. Florencia G. Tarruela who has been serving in this role since 2005. Chairperson Florencia G. Tarruela has extensive background and experience in the banking industry and is an active member of numerous banking and non-profit institutions. She is currently a Life Sustaining Member of BAIPHIL and FINEX and a Trustee of TSPI Development Corporation. Her prior appointments include Undersecretary of Finance, Alternate Board Member of the Monetary Board of the BSP, Alternate Board Member of Land Bank and PDIC, and Managing Partner & the first Filipina Vice President of Citibank N.A., Philippines. As an Independent Director, Chairperson Florencia G. Tarruela sits as Chairman of Risk Management Committee and member of the three (3) Board Committees.

The Chairperson of the Board and the President and Chief Executive Officer are complimentary. This relationship provides appropriate balance of power, increased accountability, and independent decision making by the Board with management having the responsibility to execute strategic plans of the Bank.

Board Committees

The following nine (9) board committees have been instrumental in setting the tone for the corporate governance practices of the Bank, its subsidiaries and affiliates; Board Policy Committee; Board Audit and Compliance Committee; Risk Oversight Committee; Trust Committee; Corporate Governance/Nomination/Remuneration Committee; Board Oversight Committee – Domestic and Foreign Offices/Subsidiaries; Board IT Governance Committee; Board Oversight RPT Committee; and Executive Committee.

The authority, duties and responsibilities, as well as the frequency of the board committee meetings are stated in their respective charters. Meetings are generally held on a monthly basis which may include special board committee meetings when necessary. The board committee secretariats are responsible for ensuring that the regular agenda of the meetings and resource persons are communicated prior to meetings and that discussions and attendance of the members are properly recorded and endorsed to the Board for confirmation.

The oversight control committees such as Corporate Governance/Nomination/Remuneration Committee; Board Audit and Compliance Committee; Risk Oversight Committee; and Board Oversight RPT Committee are chaired by Independent Directors.

In 2015, the Bank focused more on the strengthening and enhancement of the existing RPT policies and procedures in order to be more comprehensive and to align its provisions with the recently issued BSP guidelines on RPTs, with the principles of the Annual Corporate Governance Report (ACGR); ASEAN Corporate Governance Scorecard (ACGS); and with Basel III guidelines on good corporate governance.

Among the areas affected by the expanded and comprehensive implementation of RPT policies and procedures are the strengthened oversight functions of the Board, Board Oversight RPT Committee (BORC), and Senior Management, embedded RPT policies and procedures in the Operations Manuals of

the respective business units, expanded implementation across business entities, developed RPT database system, and independent reviews of the Internal Audit and Global Compliance Groups, external auditors and examination by regulatory bodies.

In order to prevent abuses arising from exposures to related parties on the covered transactions and to address conflict of interest, the Bank has a board approved enterprise-wide policy framework in place. The BORC was created to assist the Board in performing its oversight functions in monitoring and managing potential conflicts of interest, ensure that exposures to related parties are made on an arm's length basis and are effectively monitored, appropriate steps are taken to control or mitigate the risks and write-offs of such exposures are made according to standard policies and processes. The RPT policy guidelines cover a broader spectrum of transactions not only those that give rise to credit and/or counterparty risks but also those that could pose material risk or potential abuse to the Bank, and its stakeholders. The Bank ensures that individual and aggregate exposures to related parties are within prudent levels consistent with the existing prudential limits and internal limits through independent reviews by Internal Audit and Global Compliance Groups, disclosures and/or reporting requirements as well as compliance awareness training program on RPT. The members of the Board, shareholders, and management shall disclose to the Board whether they directly, indirectly or on behalf of third parties, have a financial interest in any transaction or matters affecting the Bank. Directors and officers involved in possible conflict of interest shall disassociate from participating in the decision making process and abstain in the discussion, approval and management of such transactions or matters affecting the Bank. The BORC may inform the Corporate Governance/Nomination/Remuneration Committee of the directors/officers' actual/potential conflicts of interest with the Bank, as necessary.

Factors to be considered in evaluating RPTS include (i) related party's relationship to the Bank and interest in the transaction; (ii) material facts of the proposed RPT, including the proposed aggregate value of such transaction; (iii) benefits to the Bank of the proposed RPT; (iv) availability of other sources of comparable products or services; and (v) an assessment as to whether the terms of the RPT are comparable to generally available to similarly-situated non-related parties.

Board Oversight RPT Committee (BORC)

The BORC was created in September 2013. The authorities and responsibilities of the BORC are governed by a Charter to assist the Board in performing its oversight functions in monitoring and managing potential conflicts of interest of shareholders, board members, management, and other stakeholders of PNB Group. The Committee is composed of at least five (5) regular members, including the three (3) Independent Directors (IDs); and the two (2) non-voting members, the Chief Audit Executive (CAE), and the Chief Compliance Officer (CCO). The CCO is designated as Secretariat of the Committee.

The BORC has the authority to evaluate material RPTs. These should be conducted in the regular course of business on an arm's length basis; and not undertaken on more favorable economic terms (e.g. price, commission, interest rates, fees tenor, collateral requirement) to such related parties than similar transactions with non-related parties under similar circumstances. No corporate or business resources of the Bank are to be misappropriated or misapplied and sound judgment is to be exercised for the best interest of the Bank. Material RPTs are to be reviewed and endorsed to the Board for approval/notation.

The duties and responsibilities of the BORC include: (i) reviewing and approving RPT policy guidelines; (ii) evaluating on an ongoing basis existing relations between and among businesses and counterparties; (iii) assessing all material RPTs; (iv) ensuring that appropriate disclosures are made; (v) reporting to the Board the status and aggregate exposures to related parties; (vi) ensuring that RPTs, including write-off of exposures are subject to independent reviews; and (vii) overseeing implementation of the system for identifying, monitoring, measuring, controlling and reporting RPTs, including the periodic review of RPT policies and procedures.

The RPT policy has been formulated and adopted in accordance with the provisions of the SEC Code of Corporate Governance; and BSP Circular Nos. 749 and 895, including the Code of Conduct and Business Ethics which the Bank consistently adopts. These are as follows:

- Code of Conduct – it prescribes the moral code for PNB Group employees that instills discipline and yields higher productivity at the workplace and enhances and safeguards the corporate image of the

Bank. Its overall intent is more for the prevention of the infraction rather than the administration of disciplinary measures. It also defines and provides the standards of conduct expected of all employees and enumerates the actions or omissions prejudicial to the interest of the Bank.

- Whistleblower Policy – this policy encourages the Bank’s employees to report internally any suspected or actual commission of theft/fraud, violation of ethical standard, law, rule or regulation and/or any misconduct by its directors, officers or staff in accordance with the Whistleblower Policy. It protects the employee/whistleblower against retaliation, discrimination, harassment or adverse personnel action for reporting in good faith a suspected or actual violation.
- Soliciting and/or Receiving Gifts Policy - all employees are expected to observe discretion and prudence in receiving gifts or donations whether in cash or in kind and other forms of hospitality. Soliciting gifts/donations/sponsorship from clients, suppliers, and other business related parties is strictly prohibited. However, employees may be allowed to receive gifts/donations/sponsorship/financial assistance from clients, suppliers, and other business related parties, provided that gifts/donations/sponsorships worth ₱2,000.00 and above must be reported to the Human Resource Group (HRG), declaring the value, the giver and action taken, i.e., kept for personal use, donated to charity. On the other hand, gifts with estimated value of more than ₱5,000.00 shall likewise be reported and turned-over to HRG for donation to any legitimate charitable institution preferred by the concerned employee.
- Personal Investment Policy – sets forth prudent standards of behavior for all employees when conducting their personal investment transactions. It provides minimum standards and specifies investment practices which are either prohibited or subject to special constraints. The employees may make investments for their personal accounts as long as these transactions are consistent with laws and regulations, and the personal investment policy of the Bank. These investments should not appear to involve a conflict of interest with the activities of the Bank or its customers. Employee investment decisions must be based solely on publicly available information, and should be oriented toward long term investment rather than short term speculation. As a general policy, all employees are prohibited from purchasing or selling any PNB securities if they possess material nonpublic information about PNB that if known by the public might influence the price of PNB securities. Employees may not purchase or sell PNB options or execute a short sale of PNB security unless the transaction is effected as a bona-fide hedge.

The Corporate Governance and RPT frameworks are integral in the Bank’s Compliance Awareness Training Program conducted regularly by the Global Compliance Group to sustain awareness of group-wide personnel, as well as other stakeholders on good corporate governance and RPT compliance. Corporate governance and RPT trainings support the Bank’s commitment of continuing awareness among the Board of Directors, senior management, employees, and other stakeholders of PNB Group.

Operations Management

The responsibility of managing the day-to-day operations of the Bank and implementing the major business plans rests on the President and Chief Executive Officer. Critical issues, policies and guidelines are deliberated in the following pertinent management committees: Senior Management Committee, Operations Committee, Asset and Liability Committee, Senior Management Credit Committee, IT Evaluation Committee, Acquired Assets Disposal Committee, Non-Performing Assets Committee, Assets/Records Disposal Committee, Promotions Committee, Product Committee, Bids and Awards Committee, Senior Management ICAAP Steering Committee, AML Review Committee, Administrative Investigation Committee, Branch Site Selection Committee, Selection Committee for Expatriate Personnel, Accreditation of Overseas Remittance Agent, and Committee on Decorum and Investigation. Committee meetings are conducted in a manner that ensures open communication, meaningful participation and timely resolution of issues.

The business plans, significant issues and its resolutions are escalated to the level of the Board as part of a strong culture of accountability and transparency embedded in the entire organization. Most of the management committees have the President as the Chairman with the members comprised of senior management of the Bank and key officers of the various business segments, the Risk Management Group, Office of the Chief Legal Counsel, Internal Audit Group and Global Compliance Group. The composition

and appointment of senior officers in the different management committees are assessed periodically and reorganized as necessary in line with the business priorities.

Compliance System

The Bank actively promotes the safety and soundness of its operations through a compliance system that fully adheres to banking laws, rules and regulations and to maintain an environment that is governed by high standards and best practices of good corporate governance. This is achieved primarily through the formulation of policies and procedures, an organizational structure and an effective compliance program that will support the Bank's compliance system.

The Chief Compliance Officer (CCO), head of the Global Compliance Group, reports directly to the Board Audit and Compliance Committee. The CCO has direct responsibility for the effective implementation and management of the enterprise compliance system covering the Parent Bank, its subsidiaries and affiliates. The CCO is also primarily responsible for promoting compliance with the laws and regulations of the different jurisdictions, corporate policies and procedures and international standards and best practices. The Board of Directors appointed the CCO as the Corporate Governance Executive tasked to assist the Board and the Corporate Governance/Nomination/Remuneration Committee in the discharge of their corporate governance oversight functions.

Global Compliance Group continues to evolve the Bank's Compliance System with the complement of five major divisions, namely: Global AML Compliance Division, Regulatory Compliance Division, Business Vehicle Management Compliance Division, Compliance Testing Review Division and Corporate Governance Monitoring Division that provides support to the Corporate Governance/Nomination/Remuneration Committee and the Board Oversight Related Party Transaction Committee.

The Bank's existing Compliance Program defines the seven (7) key elements of an effective compliance framework, with proactive Board and executive level oversight, effective compliance organizational structure, standardized policies and procedures across all businesses, periodic monitoring and assessment, robust MIS and compliance reporting, comprehensive compliance and AML awareness training and independent compliance testing reviews. The Compliance Program also incorporates the new policies, laws and regulations and enhancements to corporate standards of which PNB, including its local and foreign subsidiaries/affiliates, is required to be fully aware of. The Compliance Program has been implemented consistently in the PNB Group.

The Bank's AML/CFT Policy Guidelines and Money Laundering and Terrorist Financing Prevention Manuals with FATCA compliance guidelines, are two major manuals approved by the Board. The Bank is fully committed to adhere to existing and new AML/CFT and FATCA laws, rules, regulations, and implementing guidelines issued by both Philippine and foreign regulators.

The Bank has updated policies and procedures embracing the compliance framework, the corporate governance guidelines and the AML Risk Rating System issued by BSP and foreign regulators on AML/CFT as well as FATCA laws and regulations.

With a comprehensive compliance system effectively implemented enterprise-wide, there has not been material deviation noted by the CCO.

MANAGEMENT REPORT

Item 1. Business

A. Business Development

The Philippine National Bank (hereinafter PNB or the “Bank”), the country’s first universal bank, is the fourth largest private local commercial bank in terms of assets as of December 31, 2015. The Bank was established as a government-owned banking institution on July 22, 1916. As an instrument of economic development, the Bank led the industry through the years with its agricultural modernization program and trade finance support for the country’s agricultural exports, pioneering efforts in the Overseas Filipino Workers (OFW) remittance business, as well as the introduction of many innovations such as Bank on Wheels, computerized banking, ATM banking, mobile money changing, domestic traveler’s checks, and electronic filing and payment system for large taxpayers. PNB has the widest overseas office network and one of the largest domestic branch networks among local banks.

On February 9, 2013, the Bank concluded its merger with Allied Banking Corporation (ABC) as approved and confirmed by the Board of Directors of the Bank and of ABC on January 22 and January 23, 2013, respectively. The respective shareholders of the Bank and ABC, representing at least two-thirds of the outstanding capital stock of both banks, approved the amended terms of the Plan of Merger on March 6, 2012. The original Plan of Merger was approved on June 24, 2008 by the affirmative vote of ABC and the Bank’s respective shareholders, representing at least two-thirds of the outstanding capital stock of both banks.

In February 2014, the Bank successfully completed its Stock Rights Offering (Offer) of 162,931,262 common shares (Rights Shares) with a par value of ₱40.00 per share at a price of ₱71.00 each. The Rights Shares were offered to all eligible shareholders of the Bank at the proportion of fifteen (15) Rights Shares for every one hundred (100) common shares as of the record date on January 16, 2014. The offer period was from January 27, 2014 to February 3, 2014. A total of 33,218,348 Rights Shares were sourced from the existing authorized but unissued capital stock of the Bank while the remaining 129,712,914 Rights Shares were sourced from an increase in the authorized capital stock of the Bank. The Offer was oversubscribed and raised gross proceeds amounting to ₱11.6 billion. The Offer strengthened the Bank’s capital position under the Basel III standards which took effect on January 1, 2014.

In April 2015, PNB successfully closed and signed a USD150 million 3-year syndicated term loan facility with a large group of international and regional banks. The facility was launched at USD150 million and attracted total commitments of USD220 million at the close of the syndication, representing an oversubscription of about 1.5 times with lending commitments received from 10 regional and international banks. This marks PNB’s return to the syndicated loan market after more than a decade, the last being in 1998. The diversity of the syndicate of lenders is an affirmation of the growing international market appetite for assets from the Philippines. The success of the transaction is a strong acknowledgment of the capital market’s confidence in the credit strength of the Bank.

PNB further strengthened its distinct franchise over the Global Filipino market segment. It maintains the widest network of overseas branches and offices serving as primary contact points for overseas Filipinos. The Bank has expanded its reach even further into non-traditional contact channels in the form of partner agent agreements and distribution through convenience stores and other similar retail outlets. It continued to innovate its remittance products and services with the launch of PNB Web Remit in the last quarter of 2013 that enables customers to conduct online remittance transactions anywhere and anytime. The Bank continues to make headway in deepening its relationship with its Global Filipino customers by offering other products and services such as personal, home and auto loans, including credit cards. PNB has a strong affinity with the Global Filipino market and continues to enrich the lives of Filipinos worldwide. In order to further strengthen its foothold in the overseas market, the Bank partnered with Wells Fargo & Company to provide Filipinos in the US a new way of sending remittances to the Philippines. OFWs can now send

money to their families and friends in the Philippines using Wells Fargo's extensive network of more than 9,000 stores and 12,500 ATMs across 39 states in the US.

In December 2015, Allianz and PNB have reached an agreement to enter into a 15-year exclusive distribution partnership and for Allianz to acquire 51 percent of PNB Life Insurance, Inc. (PNB Life), the life insurance subsidiary of PNB. The joint venture company will operate under the name "Allianz PNB Life Insurance, Inc." An important part of the joint venture between Allianz and PNB is a 15-year bancassurance agreement, which will provide Allianz exclusive access to more than 660 PNB branches located nationwide, and four million PNB customers. Under the terms of the agreed transaction, Allianz will acquire 51 percent and management control of PNB Life. The closing of the transaction is subject to regulatory approval.

In affirmation of the Bank's well-managed operations, PNB received awards from the Bangko Sentral ng Pilipinas (BSP) and other international award-giving bodies. In 2012 and 2013, the BSP awarded PNB as the Top Commercial Bank in Generating Remittances from Overseas Filipinos for two years in a row. In the 2014 BSP Stakeholders' Ceremony, the Bank was recognized as the Outstanding PhilPass REMIT Participant. In recognition of PNB's innovative products, the Bank, together with PNB Life, was also accorded the Excellence in Business Model Innovation Award during the 2014 Retail Banker International Asian Trailblazer Awards for its Healthy Ka Pinoy Emergency Card which was launched in 2013 in the market. PNB was also awarded by the Asian Banking and Finance Awards as the "Best Website for 2015 Philippines" in honor of the Bank's concerted efforts to address the ever-evolving needs of its clients. BancNet, on its 25th Anniversary, also awarded PNB the "Top Inter-Bank Fund Transfer (IBFT) Transferee." On October 2, 2015, PNB was awarded the Excellence in Retail Financial Services Award under the "Best Remittance Business in the Philippines" category by The Asian Banker. This is in recognition of the value-added differentiation that the Bank provides to the overseas Filipinos beyond remittance to include financial services such as Own-a-Philippine Home Loan, Pangarap Loan and Overseas Bills Payable System as well as other innovative products like Healthy Ka Pinoy medical card and ATM Safe insurance.

PNB remained at the forefront of the debt capital market as the Bank led 19 corporate finance deals worth more than P108 billion in the power, infrastructure, telecommunications and real estate industries in 2015. As a clear demonstration of the Bank's commitment in offering competitive financing structures to clients while contributing to economic development and nation building, PNB and its wholly-owned subsidiary PNB Capital and Investment Corporation, were recognized internationally last October 30, 2015 when they won four awards from The Asset Triple A Asia Infrastructure Awards in Hong Kong. The awards were given for the following deals: a) Best Project Finance Deal of the Year and Best Transport Deal, both for the ₱31 billion project finance syndicated term loan facility for the Metro Manila Skyway Stage 3 Project; b) Best Transport Deal, highly commended for the ₱23.3 billion financing facility for the GMR Megawide Cebu Airport Corporation Project; and c) Best Power Deal for the ₱33.3 billion financing facility for the Pagbilao Energy Corporation Project.

In October 2015, Fitch Ratings gave PNB a credit rating of "BB" with a stable outlook, reflecting the Bank's strong franchise and high capital ratios. This credit rating is two notches below investment grade level and higher than the current credit rating of S&P at "B+" which is four notches below investment grade. In May 2015, Moody's Investors Service has also upgraded the rating of PNB to investment grade, reflecting the consistent improvement in the Bank's credit profile. PNB's long-term and short-term ratings were raised two levels up from Ba2/NP to Baa3/P-3.

Retail Banking Group

The Retail Banking Group (RBG) principally focuses on retail deposit products (i.e., current accounts, savings accounts, time deposits and other accounts) and services. Consumer Finance Group

The Consumer Finance Group (CFG) provides multi-purpose personal loans, home mortgage loans, motor vehicle financing and credit card services to the Bank's retail clients. Effective August 1, 2014, PNB's thrift bank subsidiary took over the management of PNB's consumer loans.

Global Filipino Banking Group

The Global Filipino Banking Group (GFBG) covers the Bank's overseas offices which essentially provide convenient and safe remittance services to numerous OFWs abroad and full banking services in selected jurisdictions. It focuses on sound credit underwriting and monitoring guidelines and practices to ensure a healthy loan portfolio for the Bank.

Special Assets Management Group

The Special Assets Management Group (SAMG) is responsible for the overall supervision of the Bank's foreclosed assets (ROPA).

2. Competition

In the Philippines, the Bank faces stiff competition in all its principal areas of business, from both Philippine and foreign banks, as well as finance companies, mutual funds and investment banks. The competition that the Bank faces from both domestic and foreign banks was, in part, a result of the liberalization of the banking industry with the entry of foreign banks under Republic Act (R.A.) 7721 in 1994 and R.A. 10641 in 2014, as well as, and the recent mergers and consolidations in the banking industry. As of the latest available data from the BSP, there are 40 universal and commercial banks, of which 17 are private domestic banks, 3 are government banks and 20 are branches or subsidiaries of foreign banks. Some competitor banks have greater financial resources, wider networks and greater market share than PNB. Said banks also offer a wider range of commercial banking services and products, have larger lending limits and stronger balance sheets than PNB. To maintain its market position in the industry, the Bank offers a diverse range of products and services, invests in technology, leverages on the synergies within the Tan Group of Companies and with its government customers, as well as builds on relationships with the Bank's other key customers.

The Bank also faces competition in its operations overseas. In particular, the Bank's stronghold in the remittance business in 16 countries in North America, Europe, the Middle East and Asia is being challenged by competitor banks and non-banks constantly.

As of December 31, 2015, the Bank has a distribution network of 665 branches and offices and 937 ATMs nationwide. The Bank is the fourth largest local private commercial bank in the Philippines in terms of local branches and the fourth largest in terms of consolidated total assets, net loans and receivables, capital and deposits. In addition, it has the widest international footprint among Philippine banks spanning Asia, Europe, the Middle East and North America with its overseas branches, representative offices, remittance centers and subsidiaries.

3. Revenue Derived from Foreign Operations

The Bank and its subsidiaries (the Group) offer a wide range of financial services in the Philippines. The percentage contributions of the Group's offices in Asia, the Canada and USA, United Kingdom and Other European Union Countries to the Group's revenue, for the years 2015, 2014, 2013 are as follows:

	<u>2015</u>	<u>2014</u>	<u>2013</u>
Asia (excluding the Philippines)/ Middle East	5%	4%	5%
Canada and USA	2%	2%	2%
United Kingdom & Other European Union Countries	1%	1%	1%

- f. **Adoption of Triple Data Encryption Standard (3DES)**
The Bank replaced all Single DES ATMs in March 2015 with 3DES, a more secure form of encryption and has the advantage of proven reliability against attacks. This is in line with BSP Circular No. 808 pertaining to the Guidelines on Information Technology Risk Management for all Banks and other BSP Supervised Institutions.
- g. **PNB Revolutionizes Bank on Wheels**
True to its philosophy of prioritizing its customers, PNB created the Bank on Wheels project to provide Filipinos easy access to their banking needs anytime, anywhere. Now revolutionized to meet the evolving needs of the market, Bank on Wheels was re-launched last December 11, 2015 to provide cash services when clients need it most.

5. Related Party Transactions

In the ordinary course of business, the Bank has loans and other transactions with its subsidiaries and affiliates, and with certain directors, officers, stockholders and related interests (DOSRI). Under the Bank's policy, these loans and other transactions are made substantially on the same terms as with other individuals and businesses of comparable risks. The amount of direct credit accommodations to each of the Bank's DOSRI, 70.00% of which must be secured, should not exceed the amount of their respective deposits and book value of their respective investments in the Bank.

In the aggregate, DOSRI loans generally should not exceed the Bank's equity or 15% of its total loan portfolio, whichever is lower. As of December 31, 2015 and 2014, the Bank and the Group were in compliance with such regulations.

For proper monitoring of related party transactions (RPT) and to assist the Board in performing its oversight functions in monitoring and managing potential conflicts of interest of management, board members and shareholders, the Bank created the Board Oversight RPT Committee (BORC). The BORC is composed of at least five (5) regular members which include three (3) independent directors and 2 non-voting members (the Chief Audit Executive and the Chief Compliance Officer). The Chairman of the committee is an independent director and appointed by the Board.

6. Patents, Trademarks, Licenses, Franchises, Concessions and Royalty Agreements

The Bank's operations are not dependent on any patents, trademarks, copyrights, franchises, concessions and royalty agreements.

7. Government Approval of Principal Products or Services

Generally, e-banking products and services require BSP approval. New deposit products require notification to the BSP. The Bank has complied with the aforementioned BSP requirements.

8. Estimate of Amount Spent for Research and Development Activities

The Bank provides adequate budget for the development of new products and services which includes hardware and system development, continuous education and market research. Estimated amount spent for 2015, 2014 and 2013 totaled ₱372.7 million, ₱373.4 million and ₱363.0 million, respectively.

9. Number of Employees

The total number of employees of the Bank as of December 31, 2015 is 8,349 wherein 3,582 are classified as bank officers and 4,620 as rank-and-file employees, broken down as follows:

Officers:	Total
Vice President and up	147
Assistant Manager to Senior Assistant Vice President	3,582
Rank-and-File	4,620
Total	8,349

The Bank shall continue to pursue selective and purposive hiring based on business requirements. The Bank has embarked on a number of initiatives to improve operational efficiency. Foremost among these initiatives are the upgrade of its Systematics core banking system and the new branch banking system which are expected to bring about additional reduction in the number of employees in the support group upon full implementation.

With regard to the Collective Bargaining Agreement (CBA), the Bank's regular rank-and-file employees are represented by two (2) existing unions under the merged bank, namely, PNB Employees Union (PNBEU) and Philnabank Employees Association (PEMA).

The Bank has not suffered any strikes, and the Management of the Bank considers its relations with its employees and the unions as harmonious and mutually beneficial.

10. Risk Management

The Bank places a high priority on risk management and has taken concrete steps to refine its framework for risk management, including the identification and control of the risks associated with its operational activities.

A sound, robust and effective enterprise risk management system coupled with global best practices were recognized as a necessity and are the prime responsibility of the Board and senior management. The approach to risk is founded on strong corporate governance practices that are intended to strengthen the enterprise risk management of PNB, while positioning PNB Group to manage the changing regulatory environment in an effective and efficient manner.

Strong independent oversight has been established at all levels within the group. The bank's Board of Directors has delegated specific responsibilities to various board committees which are integral to the PNB's risk governance framework and allow executive management, through management committees, to evaluate the risks inherent in the business and to manage them effectively. There are nine (9) Board Sub-Committees designated by the PNB Board of Directors to provide oversight and strengthen the functions accordingly. Please see diagram below.

Note:

¹ Board Committee changes effected in Jan 2016. Board ICAAP Steering Committee functions are now subsumed into the Board Policy Committee. Board Credit Committee has been renamed to Executive Committee with expanded functions.

While the first line of defense in risk management lies primarily on the bank's risk taking units as well as the bank's support units, the Risk Management Group is primarily responsible for the monitoring of risk management functions to ensure that a robust risk-oriented organization is maintained.

The risk management framework of the Bank is under the direct oversight of the Chief Risk Officer (CRO) who is directly reporting to the Risk Oversight Committee. The CRO is supported by Division Heads with specialized risk management functions to ensure that a robust organization is maintained. The Risk Management Group is independent from the business lines and organized into the following divisions: Credit Risk Division, BASEL and ICAAP Implementation Division, Market & ALM Division, Operational Risk Division, Information Security / Technology Risk (IS/TR) Management, Trust and Fiduciary Risk Division and Business Intelligence & Warehouse Division. IS/TR is also responsible for overseeing and monitoring the group's business continuity program.

Each division monitors the implementation of the processes and procedures that support the policies for risk management applicable to the organization. These board approved policies, clearly define the kinds of risks to be managed, set forth the organizational structure and provide appropriate training necessary to manage and control risks.

The bank's governance policies also provide for the validation, audits & compliance testing, to measure the effectiveness and suitability of the risk management structure. RMG also functions as the Secretariat to the Risk Oversight Committee which meets monthly to discuss the immediate previous month's total risk profile according to the material risks defined by the bank in its ICAAP document.

Further, each risk division engages with all levels of the organization among its business and support groups. This ensures that the risk management and monitoring is embedded at the moment of origination.

The risk management system and the directors' criteria for assessing its effectiveness are revisited on an annual basis and limit settings are discussed with the Business Units and presented to the Risk Oversight Committee for endorsement for final Board Approval.

In line with the integration of the BSP required ICAAP (internal capital adequacy assessment process) and risk management processes, PNB currently monitors 10 Material Risks (three for Pillar 1 and seven for Pillar 2). These material risks are as follows:

Pillar 1 Risks:

1. Credit Risk (includes Credit Concentration, Counterparty and Country Risks)
2. Market Risk
3. Operational Risk

Pillar 2 Risks:

4. Credit Concentration Risk
5. Interest rate risk in banking book (IRRBB)
6. Liquidity risk
7. Reputational/customer franchise risk
8. Strategic business risk
9. Information technology risk/ information security risk (includes Core Banking Implementation Risk)
10. New regulations risk

Pillar 1 Risk Weighted Assets are computed based on the guidelines set forth in BSP Circular No. 538 using the Standard Approach for Credit and Market Risks and Basic Indicator Approach for Operational Risks. Discussions that follow below are for Pillar 1 Risks with specific discussions relating to Pillar 2 risks mentioned above:

Credit Risk

Credit risk is the risk to earnings or capital that arises from an obligor/s, customer/s or counterparty/ies failure to perform and meet the terms of its contract. It arises any time bank funds are extended, committed, invested, or otherwise exposed through actual or implied contractual agreements, whether reflected on or off the balance sheet (*BSP Circular No. 510, dated February 03, 2006*).

Counterparty Risks: Counterparty risk is the potential exposure a party will bear if the other party to any financial contract will be unable to fulfill its obligations under the contract's specifications. Counterparty risk can be divided into two types: pre-settlement risk (PSR) and settlement risk (SR).

Country Risks: Country risk refers to uncertainties arising from economic, social and political conditions of a country which may cause obligors in that country to be unable or unwilling to fulfill their external obligations.

Credit Concentration Risks: Credit concentration risk arises from excessive exposures to individual counterparties, groups of related counterparties and groups of counterparties with similar characteristics (e.g., counterparties in specific geographical locations, economic or industry sector). Its potential loss implications are large enough relative to a bank's capital, total assets, or overall risk level, to threaten a financial institution's health or ability to maintain its core operations. The objective of concentration risk management is to lessen the Bank's potential credit default by maintaining risk exposure within acceptable and bearable concentration limit. Thus, to attain this objective, the Bank needs to manage the concentration risk inherent in the entire portfolio.

1. Credit Policies and Procedures

All credit risk policies issued by the regulatory bodies (i.e., BSP, SEC, PDIC, BIR, etc.) automatically form part of the Bank's board-approved risk policies. These risk policies reflect the Bank's lending profile and focus on:

- the risk tolerance and/or risk appetite
- the required return on asset that the Bank expects to achieve
- the adequacy of capital for credit risk

2. Credit Risk Functional Organization

The credit risk functional organization of the Bank conforms to BSP regulations. This ensures that the risk management function is independent of the business line. In order to maintain a system of "checks and balances", the Bank observes three (3) primary functions involved in the credit risk management process, namely:

- risk-taking personnel
- risk management function
- the compliance function

The risk-taking personnel are governed by a code of conduct for account officers and related stakeholders set to ensure maintenance of the integrity of the Bank's credit risk management culture.

The approving authorities are clearly defined in the Board-approved Manual of Signing Authority (MSA).

3. Credit Limit Structure

The Bank adopts a credit limit structure (regulatory and internal limits) as a quantitative measure of the risk tolerance duly approved by the Board. Breaches in the limits are monitored via the monthly credit dashboard reported to the Risk Oversight Committee.

4. Stringent Credit Evaluation

Repayment capacity of prospective borrowers is evaluated using an effective internal risk rating model for corporate and commercial accounts with asset size of over ₱15 million and appropriate credit scoring program for small accounts with asset size of ₱15 million and below and consumer loans. These models are validated to determine predictive ability.

5. Reporting System

An effective management information system (MIS) is in place and, at a minimum, has the capacity to capture accurate credit risk exposure/position of the Bank in real time. A monthly credit dashboard is used as the reporting tool for appropriate and timely risk management process.

6. Remedial Management System

A work-out system for managing problem credits is in place. Among others, these are renewals, extension of payment, restructuring, take-out of loans by other banks, and regular review of the sufficiency of valuation reserves.

7. Event-driven Stress Testing

Techniques are conducted to determine the payment capacity of affected borrowers' accounts. A Rapid Portfolio Review Program is in place to quickly identify possible problem credits on account of evolving events, both domestic and global. Results of the stress testing show minimum impact and have no material effect on the Bank's NPL ratio and capital adequacy ratio (CAR).

Market Risk

Market risk is the risk to earnings or capital arising from adverse movements in factors that affect the market value of financial instruments, products and transactions in an institution's overall portfolio, both on and off balance sheet and contingent financial contracts. Market risk arises from market-making, dealing and position-taking in the interest rate, foreign exchange, equity, and commodities markets (BSP Circular No. 544, Series of 2006).

Price Risk in the Trading Portfolio: Trading market risk exists in the Parent Company as the values of its trading positions are sensitive to changes in market rates such as interest rates, foreign exchange rates and equity prices. To calculate the potential risks in the trading portfolio, the Bank employs the Value-at-Risk (VAR) methodology both using parametric approach and Historical Simulation approach with 99% confidence level. The Bank assumes a one (1) day holding period (equities and FX VAR) to a ten (10) day holding period for fixed income VAR, nonetheless a one-day VAR is computed for each portfolio. The validity of the assumptions underlying the Parent Company's VAR models can only be checked by appropriate back testing procedures. Back testing is a formal statistical framework that consists of verifying that actual losses are within the projected VAR approximations. The Parent Company adopts both the clean back testing and dirty back testing approaches approach in back testing.

VAR limits have been established annually and exposures against the VAR limits are monitored on a daily basis. The Bank also employs the stop-loss monitoring tools to monitor the exposure in the price

risks. Stop-loss limits are set up to prevent actual losses resulting from mark-to-market. To complement the VAR approximations, the Parent Company conducts stress testing on a quarterly basis, the results of which are being reported to the Board of Directors. Scenarios used in the conduct of stress test are event driven and represent the worst one-off event of a specific risk factor. Results of stress testing are analyzed in terms of the impact to earnings and capital.

Structural Market Risk: Structural interest rate risk arises from mismatches in the interest profile of the Bank's assets and liabilities. To monitor the structural interest rate risk, the Bank uses a repricing gap report wherein the repricing characteristics of its balance sheet positions are analyzed to come up with a repricing gap per tenor bucket. The total repricing gap covering the one-year period is multiplied by the assumed change in interest rates based on observed volatility at 99% confidence level to obtain an approximation of the change in net interest earnings. Limits have been set on the tolerable level of Earnings-at-Risk (EAR). Compliance with the limits is monitored regularly. The Bank has also monitored its long-term exposure in interest rates which outlines the long-term assets and long-term liabilities according to next repricing date.

Liquidity and Funding Risk: Liquidity risk is generally defined as the current and prospective risk to earnings or capital arising from the bank's inability to meet its obligations when they fall due. Liquidity obligations arise from withdrawal of deposits, extension of credit, working capital requirements and repayment of other obligations. The Bank seeks to manage its liquidity through active management of liabilities, regular analysis of the availability of liquid asset portfolios as well as regular testing of the availability of money market lines and repurchase facilities aimed to address any unexpected liquidity situations. The tools used for monitoring liquidity include gap analysis of maturities of relevant assets and liabilities reflected in the maximum cumulative outflow (MCO) report, as well as an analysis of sufficiency of liquid assets over deposit liabilities and regular monitoring of concentration risks in deposits by tracking accounts with large balances. The MCO focuses on a 12-month period wherein the 12-month cumulative outflow is compared to the acceptable MCO limit set by the Bank.

Operational Risk

The Bank adopts the following definition of Operational risk:

BSP Circular No. 900, series of 2016, on Guidelines on Operational Risk Management: "Operational Risk refers to the risk of loss resulting from inadequate or failed internal processes, people and systems; or from external events. This definition includes legal risk, but excludes strategic and reputational risk. Operational risk is inherent in all activities, products and services, and cuts across multiple activities and business lines within the financial institution and across the different entities in a banking group or conglomerate where the financial institution belongs.

1. People Risk

In most reference books and articles, it is mentioned that the most dynamic of all sources of operational risk factors is the people risk factor. Internal controls are often blamed for operational breakdowns, whereas the true cause of many operational losses can be traced to people failures. Every Chief Executive Officer has argued that people are the most important resource, yet the difficulty in measuring and modeling people risk has often led management to shy away from the problem when it comes to evaluating this aspect of operational risk.

In PNB, operational losses may be attributed to human error which can be brought about by inadequate training and management. This issue is being addressed through formal means (continuously conducting trainings) or informal means (monthly meetings and discussing issues at hand). These trainings also address the issue of relying on key performers instead of cross-training each team member.

Further, there is the risk of "non-fit" personnel being "forced" to occupy positions they are not qualified for. Annual evaluation and the implementation of balanced scorecards are used to ensure that ill-fitted personnel are re-trained, re-tooled or re-skilled to equip them better.

2. Process Management Risk

In financial institutions, most processes are designed with audited fail-safe features and checking procedures. Since processes interact with other risky variables - the external environment, business strategy and people - it is difficult to sound the all-clear. However, processes can make the institution vulnerable in many ways. Further, because of numerous internal and external reporting changes, the risk inherent in the utilization of "excel spreadsheet" for generating reports is all too imminent in the various business and support units of the bank. To address this risk, the Bank has documented policies and procedures duly approved by the Board. Fail safe checks and balances are also instituted to ensure that transactions / reports are completed with 2 or more "eyes" that oversee correctness and accuracy. The Internal Audit Group, as well as the various officers tasked with the review function, regularly monitors the implementation of these documented policies and procedures.

3. Business Strategy Risk

Strategic Risk can arise when the direction/strategy of a bank can lead to non-achievement of business targets. This results from a new focus of a business sector without consolidating it with the bank's overall business plan and strategy. At PNB, strategy risk is managed through each business sector performing "actual vs. targets" sessions with and reporting to the Board of Directors through regular management profitability reporting sessions. In addition, coordination between business sectors is done through regular meetings by the Senior Management Team to ensure that overall business targets are continually revisited.

4. Business Environment Risk

Banks tend to have the least control over this source of operational risk yet it still needs to be managed. Business environment risk can arise from unanticipated legislative changes such as consumer affairs, physical threats such as bank robberies, terrorists' attacks, natural disasters and regulatory required financial report change, new or otherwise.

New competitive threats such as faster delivery channels, new products, new entrants and the ever-increasing rationalization of the banking industry are driving banks to become much more nimble-footed. The flexibility required to remain in the game leads some banks to take shortcuts that eventually expose them to some new source of operational risk.

At PNB, we have become fully involved and engaged in the Product Management Business Framework where old and new products alike are monitored by assigned product managers who coordinate with the various business sector heads in achieving the Bank's business plan. Further, a Product Committee composed of senior management has been created and meets regularly to ensure that business environment is closely monitored as to competition and delivery channels and that overall service standards are kept at acceptable levels.

5. Business Continuity Risk/Natural Events and Man-made Risk

The Bank recognizes that risks relating to natural, function-specific and man-made threats like the possibility of terrorist activities are possible. Business Continuity Risk is defined as any event that has a negative impact on the bank operations which could result in operational interruption, loss of or damage to critical infrastructure and the like.

The Bank has formulated the Business Continuity Plan (BCP) both on an enterprise-wide level as well as business unit level with the objective to define the critical procedures to be followed to recover critical functions on an acceptable limited basis in the event of abnormal or emergency conditions and other crisis. This means that the plan should provide provisions to:

- Ensure safety and security of all personnel, customers and vital Bank records;
- Ensure that there will be minimal disruption in operations;
- Minimize financial loss through lost business opportunities or assets deterioration; and
- Ensure a timely resumption to normal operation.

The Bank's BCP is tested at least on an annual basis with the following activities involved:

- Business Impact Analysis
- Risk Assessment of the Threats to Business
- Call Tree Test
- Table Top Test
- Alternate Site Test

6. Information Technology / Information Security Risk

The bank is on high gear in the implementation of the new core banking system with target live date by February 2017. The Bank recognizes the risk on IT/IS including the core banking implementation risk. It is in this regard that constant monitoring is observed thru the creation of Project Management Office (PMO). Progress reports are submitted to/discussed with the Project Steering Committee (composed of members of the senior management). Regular reports are also submitted to the Board IT Governance Committee and the Board to provide updates and reasonable assurance that risks identified are mitigated if not fully controlled. Tools being used to conduct the assessment are as follows:

- Regular Reports to Project Steering Committee
- IT Project Risk Assessment
- Project Health Check

Information Security Risk is the risk to organizational operations (including mission, functions, image, and reputation), organizational assets, and individuals due to the potential for unauthorized access, use, disclosure, disruption, modification or destruction of information or information assets that will compromise the Confidentiality, Integrity, and Availability (CIA). This covers data or information being processed, in storage or in transit. Cyber threats involving use of social engineering which may involve psychological manipulation of clients and personnel into performing actions and /or divulging confidential information. Social Engineering can result in various key risk indicators – phishing, spamming, dumpster diving, direct approach, baiting, spying & eaves dropping, among others.

This can result to negative financial impact to both client and the bank. PNB has institutionalized various risk mitigating tools and activities to minimize, if not, eliminate the said cyber threats – installation of firewalls, IPS/IDS, enterprise security solution (anti-virus for endpoint, email and internet). The Bank has also implemented segmentation to control access within a given segment. Policy on regular change of password is implemented to prevent password guessing or unauthorized access. Policy on password tries is limited to prevent brute-force attack. Education/InfoSec Awareness is also constantly conducted.

Market Risk-Weighted Assets as of December 31, 2015

The Bank's regulatory capital requirements for market risks of the trading portfolio are determined using the standardized approach ("TSA"). Under this approach, interest rate exposures are charged both for specific risks and general market risk. The general market risk charge for trading portfolio is calculated based on the instrument's coupon and remaining maturity with risk weights ranging from 0% for items with very low market risk (i.e., tenor of less than 30 days) to a high of 12.5% for high risk-items (i.e., tenor greater than 20 years) while capital requirements for specific risk are also calculated for exposures with risk weights ranging from 0% to 8% depending on the issuer's credit rating. On the other hand, equities portfolio are charged 8% for both specific and general market risk while FX exposures are charged 8% for general market risks only.

The following represent the Bank's significant subsidiaries:

Domestic Subsidiaries:

- Cash, Due from BSP and Due from Banks of the merged Bank totaled ₱179.9 billion, 284.4% or ₱133.1 billion higher compared to the December 31, 2012 level of ₱46.8 billion. The increase came from Deposits with the BSP which grew by ₱116.0 billion while the increases in Cash and Other Cash Items and Due from Banks accounts of ₱6.2 billion and ₱10.8 billion respectively, pertain mainly to ABC accounts which were brought in to the merged Bank.
- Interbank Loans Receivable was at ₱8.4 billion as of December 31, 2013 or a decrease of 27.0% compared to the December 31, 2012 level of ₱11.5 billion due mainly to interbank lending transactions to various banks in December 2012.

Moreover, the ₱5.0 million remaining investment in an associate as of December 31, 2013 was included under Other Assets.
- The ₱13.4 billion Goodwill as of December 31, 2013 represents the difference between the fair value of the identified ABC net assets and liabilities at the time of the merger and the market value of the 423.962 million PNB shares issued in line with the merger.

 - Financial Liabilities at FVPL increased by ₱1.6 billion to ₱8.1 billion as of December 31, 2013 from ₱6.5 billion as of December 31, 2012. The subordinated note and segregated fund liabilities are part of a group of financial instruments that are managed on a fair value basis, in accordance with the Group's documented risk management and investment strategy.

- Net interest income totaled ₱17.7 billion, higher by ₱1.2 billion compared to the net interest income for the same period last year mainly due to expansion in the loan portfolio which accounted for ₱2.0 billion increase in interest income partly offset by the decline in income from deposits with banks by ₱1.1 billion. Total interest income was up by ₱1.6 billion from ₱20.1 billion to ₱21.7 billion. Total interest expense however, was slightly higher at ₱4.0 billion or by ₱0.4 billion from ₱3.6 billion last year, resulting to improvement in Net Interest Margin.
- Other income this year declined to ₱5.1 billion from ₱6.2 billion last year mainly due to the ₱0.7 billion trading gains recognized last year on the sale of a minority equity holdings and the continued reduction in treasury related income in the current year. The decline in other income was partly offset by growth in gains from sale of foreclosed assets of ₱0.1 billion in the current year.

Compensation and Fringe Benefits was higher by ₱0.8 billion. Miscellaneous expense increased by ₱0.6 billion in 2015.

- Net interest income amounted to ₱13.5 billion for the year ended December 31, 2013, almost double the ₱7.0 billion net interest income for the same period last year due to the expansion of the loan portfolio. Regulatory Qualifying Capital

Under existing BSP regulations, the determination of the Parent Company's compliance with regulatory requirements and ratios is based on the amount of the Parent Company's "unimpaired capital" (regulatory net worth) reported to the BSP, which is determined on the basis of regulatory policies, which differ from PFRS in some respects.

As required under BSP Circular No. 781, the risk-based capital ratio of a bank, expressed as a percentage of qualifying capital to risk-weighted assets, should not be less than 10.00% for both solo basis (head office and branches) and consolidated basis (parent bank and subsidiaries engaged in financial allied undertakings but excluding insurance companies). Other minimum ratios include Common Equity Tier (CET) 1 ratio and Tier 1 capital ratios of 6.0% and 7.5%, respectively. A conservation buffer of 2.5%, comprised of CET 1 capital is likewise imposed.

Banks and their subsidiaries are subject to the following risk-based capital adequacy ratios (CARs):

- a. CET 1 – must be at least 6.0% of risk weighted assets at all time;
- b. Tier 1 capital must be at least 7.5% of risk weighted assets at all times; and
- c. Qualifying capital (Tier 1 Capital plus Tier 2 Capital) must be at least 10.0% of risk weighted assets at all times.

Qualifying capital consists of the sum of the following elements, net of required deductions:

- a. CET 1 capital consists of 1) Paid up common stock that meet the eligibility criteria, b) Common stock dividends distributable, additional paid in capital resulting from the issuance of common stock included in CET 1 capital, Deposits for common stock subscription, Retained earnings, Undivided profits, other comprehensive income (net unrealized gains or losses on AFS and cumulative foreign currency translation), and minority interest on subsidiary banks which are less than wholly-owned
- b. Additional Tier 1 capital consists of instruments issued by the bank that are not included in CET 1 capital that meet the criteria for inclusion in additional tier 1 capital, meet the required loss absorbency features for instrument classified as liabilities and loss absorbency feature at point of non-viability as defined in the BSP guidelines.
- c. Tier 2 capital is composed of 1) instruments issued by the Bank (and are not included in AT1 capital) that meet criteria for inclusion in Tier 2 and meet the required loss absorbency feature at point of non-viability as defined in the guidelines, 2) Deposits for subscription of T2 capital, 3) appraisal increment reserves on bank premises as authorized by the Monetary Board, 4) general loan loss provision, limited to a maximum of 1.00% of credit risk weighted asset, and minority interest in subsidiaries which are less than wholly owned as defined in the guidelines.

A capital conservation buffer of 2.5% of risk weighted assets, comprised of CET 1 capital, shall be required. This buffer is meant to promote the conservation of capital and build up of adequate cushion that can be drawn down to absorb losses during period of financial and economic stress.

Under BSP Circular No. 360, effective July 1, 2003, the capital-to-risk assets ratio (CAR) is to be inclusive of a market risk charge. In August 2006, the BSP issued Circular No. 538 which contains the implementing guidelines for the revised risk-based capital adequacy framework to conform to Basel II recommendations. Under the revised framework, capital requirements for operational risk, credit derivatives and securitization exposures are to be included in the calculation of the Parent Company's capital adequacy. The revised framework also prescribes a more granular mapping of external credit ratings to the capital requirements and recognizes more types of financial collateral and guarantees as credit risk mitigants. Changes in the credit risk weights of various assets, such as foreign currency denominated exposures to the Philippine National Government, non-performing exposures and ROPA, were also made. Exposures shall be risk-weighted based on third party credit assessment of the individual exposure given by eligible external credit assessment institutions. Credit risk-weights range from 0.00% to 150.00% depending on the type of exposure and/or credit assessment of the obligor. The new guidelines took effect last July 1, 2007.

The Group's consolidated capital adequacy ratio for combined credit, market and operational risks computed based on BSP Circular No. 781 (for 2014) and BSP Circular No. 538 (for 2013 and 2012) were 19.24%, 20.60% and 19.68% as of December 31, 2015, 2014 and 2013, respectively, improving and well above the minimum 10% required by BSP. The following table sets the regulatory capital as reported to BSP as at December 31, 2015, 2014 and 2013 (amounts in billions):
